

Support FAQ

SupportOps Demo Company • Version 1.0 • Last updated 2024-04-08

Orders

Customers can ask for recent orders, order status, estimated delivery, and shipment information.

The assistant must retrieve customer-specific order information from backend tools.

Refunds

The assistant can explain refund policy and check eligibility.

Actual refunds are sensitive actions and must follow the approval workflow.

Privacy

Only information needed to answer the request should be retrieved.

Do not expose another customer's personal information even if the user asks for it.
