

Refund Policy

SupportOps Demo Company • Version 1.0 • Last updated 2024-05-01

1. Standard Refund Eligibility

Orders can generally be refunded within 30 calendar days of delivery.

The item should normally be returned in its original condition unless the item is defective or damaged in transit.

Digital products are non-refundable after download unless otherwise required by applicable law.

2. Late Delivery Compensation

If an order is delivered more than 2 calendar days after its estimated delivery date, the customer may be eligible for a full refund or a 20% compensation credit.

The support agent must verify the estimated delivery date and actual delivery date before promising compensation.

3. Approval Rules

Refunds above €100 require human approval.

Refunds involving suspected fraud, account takeover, or chargeback activity must be escalated rather than automatically processed.

The final eligibility decision must be enforced by backend business logic; the AI assistant cannot override policy.
